About

I am an M.S. student at AGI-lab, advised by Prof. Jinwoo Shin. I received my B.S. in Computer Science from KAIST in 2026. I am broadly interested in robot policies, with a particular focus on building effective agentic frameworks for robotics.

Education

Korea Advanced Institute of Science and Technology (KAIST) **2026.03 – present**
M.S. in Artificial Intelligence, Kim Jaechul Graduate School of AI Advisor: Prof. Jinwoo Shin

Korea Advanced Institute of Science and Technology (KAIST) **2020.03 – 2026.02**
B.S. in Computer Science CGPA: 4.0/4.3

Publications

C: Conference, W: Workshop, P: Preprint, *: Equal contribution, †: Equal advising

[W2] RoboCurate: Harnessing Diversity with Action-Verified Synthetic Data for Robot Learning [Paper]
Seungku Kim, Suhyeok Jang, Byungjun Yoon, Dongyoung Kim, John Won, Jinwoo Shin
CoRL 2026 Workshop on The Action Gap: Large Generative Models Learn Rich Knowledge (TAG)
Oral Presentation

[W1] RoboAlign: Learning Test-Time Reasoning for Language-Action Alignment in Vision-Language-Action Models [Paper]
Dongyoung Kim, Sumin Park, Woomin Song, **Seungku Kim**, Taeyoung Kim, Huiwon Jang, Jaehyung Kim, Younggyo Seo, Jinwoo Shin
CoRL 2026 Workshop on Pretrain to Adapt: What Makes a Pretrained Policy Adaptable?

[P3] Self-Distilling Future Video Representations for World Action Models [Paper]
Huiwon Jang, Suhyeok Jang, Hyeonmo Kang, **Seungku Kim**, Jinwoo Shin, Sihyun Yu
arXiv preprint, 2026

[P2] RLDX-1 Technical Report [Paper]
Dongyoung Kim, Huiwon Jang, Myungkyu Koo, Suhyeok Jang, Taeyoung Kim, ..., **Seungku Kim**, ..., Jinwoo Shin
Technical Report, 2026

[P1] Adversarial Reinforcement Learning Framework for ESP Cheater Simulation [Paper]
Inkyu Park, Jeong-Gwan Lee, Taehwan Kwon, Juheon Choi, **Seungku Kim**, Junsu Kim, Kimin Lee
arXiv preprint, 2025

Experience

CNAI *Backend, AI Engineer* **2022.07 – 2024.07**
- Developed and maintained the backend for "KT AI Human Studio," a virtual human video generation platform.
- Advanced a lesion detection model for a pathology analysis service, targeting Focal Necrosis using YOLOv5.
- Utilized VITS model to build and enhance a Korean TTS and Voice Conversion solution for Lotte Homeshopping.

KAIST RISE Lab *Research Intern* **2024.08 – 2025.08**
↪ advised by Prof. Kimin Lee

Academic Services

- Reviewer: CoRL Workshop

Awards

KAIST Dean's List **Fall 2020, Spring 2025**
